SKILLS

- **Languages:** C++, Java, C, Python, JavaScript, SQL
- **Frameworks/Concepts:** Express.js, Reacts.js, tailwind, PHP, DSA, OOPS, HTML, CSS
- **Database:** MySQL, MongoDB, PostgreSQL
- **Tools/Platforms:** GitHub, Docker, XAMP, Git, VS Code.++
- **Soft Skills:** Problem-Solving, Adaptability, Critical Thinking, Communication

PROJECTS

- Jetter- Smart Expense Tracking Application | [Github](#)Dec 2025 – Jan 2026
- **Created a full-stack MERN application** with JWT authentication, role-based access control, secure password hashing (bcrypt), and protected APIs, ensuring scalability and production-level security.
 - **Implemented AI-powered** expense analysis using Gemini 2.5 API (LLM) to provide spending insights, anomaly detection, **smart categorization**, and natural-language financial queries.
 - **Designed real-time features and payments** including budget alerts via Socket.IO, interactive analytics dashboards, and secure subscription payments using Razorpay/Stripe.
 - **Tech Stack:** JavaScript, Reactjs, Nodejs, express, mongoDB, Tailwind.

- TechShop (Real-Time E-commerce Web Application) | [Github](#)Jun 2025 - Jul 2025
- **Built a responsive marketplace interface** with **HTML, Tailwind CSS, and JavaScript**, enabling smooth browsing of Hundreds of products listings.
 - **Developed product listing**, cart & checkout, Wishlist and user dashboard modules **using PHP, MySQL, XAMPP**, improving overall platform **performance by 35% by Structuring the Routing**.
 - **Implemented secure authentication**, By **Hashing** the password inside the Database, and **Optimized backend** architecture And **SQL caching** to support 300+ concurrent users with 40% cleaner **modular code**.
 - **Tech Stack:** JavaScript, PHP, Tailwind, SQL.

TRAINING

- ByteXLJun 2025 - Jul 2025
- Fundamentals of Data Sturcture And Algorithms in C++ | [Certificate](#)
- Explored key **data structures** such as arrays, linked lists, stacks, queues, trees, graphs, and hash tables to enhance both time and **space efficiency in problem-solving**.
 - Developed **optimized solutions** for computational challenges by analyzing **algorithmic trade-offs** and applying techniques like recursion, dynamic programming.
 - Created a Library Management Application using linked lists for efficient book retrieval and deletion, while practicing modular design and OOP concepts such as **inheritance, abstraction, classes, and objects**.

CERTIFICATION / CERTIFICATES

- Fundamentals of Virtual Reality, NPTEL: [Certificate](#)Oct 2025
- MongoDB Certified Developer Associate, MongoDB : [Certificate](#)Aug 2025
- Introduction to Hardware and Operating Systems, IBM: [Certificate](#)Aug 2025
- The Bits and Bytes of Computer Networking, Google: [Certificate](#)Feb 2024

ACHIEVEMENTS

- Solved 500+ problems on **LeetCode**, strengthening skills in data structures and algorithms across diverse difficulty levels.
- Recognized on the **Dean's List** for academic excellence, ranking among the top **10%** of students.
- 5-Star Coder at HackerRank in C++.

EDUCATION

- **Lovely Professional University**
Bachelor of Technology-Computer Science and Engineering; **CGPA: 8.55**
Punjab, India
Since April 2023
- **Kendriya Vidyalaya No.4 Jalandhar**
Intermediate (PCM); **Percentage: 83.2**
Punjab, India
April 2021 – March 2022
- **Kendriya Vidyalaya No.4 Jalandhar**
Matriculation (Standard Mathematics); **Percentage: 78.8**
Punjab, India
April 2019 – March 2020
